SUMMARY

DevOps Engineer and Cloud Consultant with 8+ years of experience architecting AWS cloud-native solutions, specializing in enterprise modernization, infrastructure automation, and Kubernetes.

EXPERIENCE

Delivery Consultant – DevOps

AWS Professional Services **December 2025 - Present, India**

- Delivered enterprise cloud engagements for Fortune 500 clients, including application modernization, data center migrations to AWS, and large-scale Java platform upgrades (Java 8 to Java 17/21/25 LTS) across 74+ applications using AWS Transform (ATX) CLI and Amazon Kiro.
- Contributed to a large-scale Application Modernization Platform (AMP) engagement, implementing trunk-based development workflows, GitHub Actions CI/CD pipelines, and reusable shared modules for deployment orchestration.
- Authored AWS Prescriptive Guidance (APG) article on Al-powered autonomous modernization factory and published companion open-source laC reference implementation on aws-samples (GitHub).
- Mentored junior consultants in the ProServe DevOps & Al-Assisted Engineering AoD program; co-delivered tech sessions on serverless architecture.
- Served as SME for the AWS Certified Al Business Strategist (AIB-C01) certification exam, receiving recognition from AWS Certification leadership.

Cloud Support Engineer 2 – Deployment

Amazon Web Services **July 2019 - December 2025, India**

- Optimized Kubernetes worker node provisioning with Karpenter consolidation, PDBs, and pod affinities, reducing over-provisioning cost by 30%.
- Designed and maintained CI/CD pipelines for seamless automation, reducing deployment errors and achieving <1s P99 latency for application availability.
- Acted as Elastic Beanstalk SME and led incident management and root cause analysis (RCA), collaborating with development teams to implement preventive measures that reduced global service escalations by 6%, deflecting ~1,200 customer cases per quarter.
- Served as Point of Contact for GenAl services (Amazon Q Developer, Amazon CodeGuru) to handle new customer onboarding.
- Conducted 50+ hiring interviews for DevOps and Networking roles; mentored 5+ engineers to become subject matter experts in core AWS services.

Software Engineer,

QA InfoTech **June 2018 - July 2019, India**

- Executed comprehensive performance testing across 34 enterprise applications using JMeter to validate stringent SLAs and performance KPIs.
- Built Python-based automated report generation and customer-facing display dashboards to deliver real-time testing analytics.
- Reduced manual testing and reporting effort by 80% through streamlined Jenkins and Python workflow automation.

PROJECT

sample-autonomous-modernization-factory

aws-samples (GitHub) • github.com/aws-samples/sample-autonomous-modernization-factory

- Architected open-source reference implementation for autonomous modernization factory workflows to support community cloud adoption.

CERTIFICATIONS

AWS Certified DevOps Professional, AWS Certified Solutions Architect - Associate, AWS Certified SysOps Administrator Associate, AWS Certified AI Practitioner, HashiCorp Certified: Terraform Associate (004)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

Krishna Institute of Engineering & Technology (KIET) • India • 2018

SKILLS

DevOps, IaC & Scripting: Terraform, CloudFormation, CDK, GitHub Actions, Jenkins, Shell Scripting, Git, AWS Transform (ATX), CodeGuru

Cloud & Containers: AWS (EC2, EKS, S3, Lambda, RDS, VPC, Elastic Beanstalk), Docker, Kubernetes, Karpenter
